

Shankary Devi Natarajan

Markham, ON | (705) 333-8283 | shankarydevinm@gmail.com | [Linkedin URL](#)

PROFESSIONAL SUMMARY

- 5+ years of experience in supporting in-house .NET applications, SaaS and COTS solutions, ensuring reliable performance and availability for 1,000+ business users
- Resolved 50+ monthly incidents by analyzing application logs, using SQL for data validation, and performing DLL/debug investigations, reducing recurring issues and improving system reliability
- Managed 12+ enterprise applications and led a team of 5 to maintain availability, resolve issues, and meet SLAs as a Deputy Application Manager on the client side
- Produced incident trends and RCA reports and presented findings during stakeholder review calls, helping to prevent repeat failures and drive process improvements
- Awarded the Insta Award at Infosys for recovering and rebuilding missing application source code from production DLLs, resolving discrepancies between repository and live environment

PROFESSIONAL EXPERIENCE

Technology Analyst

Infosys | Chennai, India

October 2017 - July 2023

- Contributed to code fixes and minor feature enhancements in C#/.NET and supported deployments, accelerating release timelines
- Generated customized SQL reports based on business stakeholder requirements, delivering an average of 10 data-driven insights per week
- Supported application decommissioning initiatives and operational readiness reviews to safely retire legacy systems
- Collaborated with QA teams to define test strategies, execute cases, and validate releases, enhancing defect detection before production rollout
- Led application upgrades and migration efforts for Windows Server, ensuring zero data loss and minimal downtime
- Managed SSL certificate renewals, user access provisioning, and vulnerability tracking to maintain security and compliance standards
- Authored knowledge base articles and troubleshooting documentation, reducing onboarding time and increasing support team efficiency
- Managed ServiceNow based change requests including impact analysis, IQ/OQ validation, and post deployment verification in regulated environments
- Executed preparation, review, and closure of 110+ quarterly, semi-annual, and annual IT controls including User Access Management, License Management and Gap Management, ensuring continuous compliance, audit readiness, and system integrity
- Provided on-call and after-hours support to maintain uptime and ensure recovery for business-critical systems

TECHNICAL SKILLS

Programming Languages:	SQL, Python (Pandas, Numpy, Matplotlib, Plotly, Dash, Scikit), C#, HTML, CSS
Software, Applications, Tools:	Jupyter Notebook, Microsoft Office, Trello, Microsoft Visual Studio, SQL Server Management Studio, SVN Repository, PAM, Dynatrace, ServiceNow
Databases:	MSSQL, MySQL, SQLite
Visualization, Cloud and AI:	IBM Cognos Analytics, Power BI, Azure AI Foundry, Microsoft Azure
Project Management:	Agile, Scrum, Kanban, Waterfall
Frameworks:	ITIL, ASP.NET MVC

EDUCATION & CERTIFICATIONS

Junior Data Analyst Program
NPower Canada | Toronto, ON

February 2026 - Expected May 2026

- IBM Data Analyst Professional Certificate
- Microsoft Azure AI900 Professional Certificate

Microsoft Certified Azure Developer Associate

March 2025 - March 2027

Master of Computer Applications
Manipal University Jaipur | Rajasthan, India

November 2021 - November 2023

- Relevant Courses: DBMS, Web Technologies, Cloud Fundamentals, Communication & Soft Skills

Bachelor of Science in Physics
SRM University | Chennai, India

June 2014 - April 2017

- Relevant Courses: Object Oriented Programming, Computer Programming, Communication & Soft Skills

VOLUNTEER EXPERIENCE

Volunteer Data Analyst
Data for Good | Toronto, ON

January 2026 - Present

- Cleaned and merged different datasets having over 15000+ records using SQL and Excel to create a master dataset for analysis
- Analyzed pre and post workshop data to evaluate program effectiveness, identifying measurable improvements across key metrics
- Performed SQL based analysis to assess workshop level, survey level impacts by uncovering trends and variations in session performance
- Created 5 interactive dashboards including word clouds to visualize open ended responses using PowerBI, to communicate insights to key stakeholders
